Your 4-H Dairy Project

This project will help you learn about dairy animals--how to select for good type, and basic feeding, care and management techniques. You will also learn to teach other how to develop an outstanding project.

Primary Objectives of the Dairy Project:

- Become aware of the scope and economics significance of the dairy industry.
- Acquire skills in dairy production through ownership and care of dairy animals.
- Learn marketing, processing, distribution, consumption, and use of dairy products.
- Learn and practice principles of cleanliness and sanitation as applied to the production and care of dairy products.
- Learn the nutritive value of dairy products and promote their use.
- Appreciate contributions and applications of scientific research to the dairy industry.
- Develop sportsmanship, cooperation, decision-making ability, and public speaking skills through participation in demonstrations, tours, judging, and/or exhibits.

General Project Completion Guidelines

- Plan a project experiences using the Project Completion Guide. This should include: (A) Giving a project demonstration, (B) Performing 3 or more activities related to the member's selected dairy project, and (C) Taking part in the Dairy Advancement Program (optional).
- Have access to a dairy animal.
- Complete a project record book. **Juniors** should maintain a record of their experience within their selected dairy projects. **Seniors** should maintain a record on their project animals as well as a record of their experiences within their selected dairy projects.

Once you've completed your project, you will receive an attractive project completion certificate. Members who complete steps in the 4-H Dairy Advancement Program will receive special recognition. See the 4-H Dairy Member Advancement Program booklet for details.

Items Required to Complete This Record

• Cover Sheet*	1
• Individual Animal Identification*	4
• Growth Record Graphs	5
• Growth Record Summary	7
• Beginning Inventory of Animals	8
• Beginning Equipment Inventory	9
• Veterinary and Health Expenses Record	10
• Breeding Record	11
• Feed Record	12
• Feed Record Summary	13
• Lactation Record	14
• Record of Show Receipts and Expenses	15
• Record of Other Expenses	16
• Progeny Record	17
• Labor Record and Record of Animals sold	18
• Ending Inventory of Animals	19
• Ending Equipment Inventory	20
• Financial Summary	21
• Project Summary*	22-24
• Pictures of Your 4-H Project*	25
• Four - H Story*	26
• Advancement Program Record and Plans for Next Year	27

*JUNIORS ARE REQUIRED TO COMPLETE ONLY THESE SECTIONS.

SENIORS ARE TO COMPLETE ALL SECTIONS OF THIS PROJECT RECORD EXCEPT THOSE LABELED "REQUIRED FOR JUNIORS TO COMPLETE ONLY".

NOTE: This Record Book is designed in a notebook format so that pages with limited space available for reporting multiple records can be easily photocopied.

INDIVIDUAL ANIMAL IDENTIFICATION

Breed _____ Birth Date _____ Tattoo _____

Name of Animal _____ Reg. No. If Applicable _____

Note: If you have more than one dairy animal, you may photocopy as many animal identification pages you need to complete your record.

GROWTH RECORD

HEART GIRTH

HEART AT WITHERS

1) Measure heart girth and height at withers of your animal at one month intervals.

2) Plot numbers on the charts (i.e. if your animal weighs 200 lbs. at two months, and is 40 inches in the heart girth, put a dot where two months and 40 inches meet.

3) Use this same procedure through to 18 months and then join the dots using straight lines.

4) Use different colored markers when putting more than one animal on a chart.

5) This growth record does not need to be completed on every animal, but once completed a few times, will teach you how to measure growth rate.

 TOTAL FEED COST PER YEAR (EXPENSES VALUE 6)	 \$_____	

DIRECTIONS FOR COMPLETING FEED RECORD

1. **POUNDS OF FEED** - This value represents the pounds of feed consumed by one animal on the date the feed was weighed, multiplied by the number of days in the months (i.e. 5 lbs. of concentrate mix was consumed on 2-18-86)

5 pounds x 28 days = 140 lbs. of concentrate consumed in February.
2. **VALUE OF FEED** - This figure represents the average total value of pounds of feed consumed per animal per month. (i.e. \$2.00 per lb. of concentrate mix) =====> 2 x 140 lbs. = \$280.00
3. **DATE FEED WEIGHED** - Select a random day each month to weigh the pounds of the different types of feed consumed by your project animal. Record this date in the appropriate column.
4. **APPEARANCE OF ANIMAL** - E = EXCELLENT, G = GOOD, F = FAIR, P = POOR
5. **YEARLY TOTAL** - This figure represents the sum of the columns of lbs. of feed consumed per month, and the value of the feed consumed per month.
6. **PRICES USED PER POUND OF FEED** - This figure should represent the price per pound of feed used when calculating the value of each feed ingredient (i.e. \$2.00 per pound was the value used in this example).

Comment concerning labor arrangements _____

1. Record time spent on dairy project.
2. If project animals are milked, fed, etc, by farm labor, or other family members, estimate what % of total labor was provided by other people.

HALTERS		

Consider depreciation or appreciation of equipment where possible.

Example: A halter costs \$10.00 new and lasts for 10 years at which time it is worn out.

$$\text{Depreciation per year} = \frac{\text{original cost}}{\# \text{ OF USEFUL YRS.}} = \frac{10.00}{10} = \$1.00$$

Subtract \$1.00 for each year the halter is used. A halter which is 5 years old is worth \$5.00.
