

Final Sustainability Action Plans

Now that you've completed the core Sustainable FloridiansSM modules and have had time to think a bit more about priorities and changes you would like to make, it is time to bring everyone's ideas together in a final sustainability action plan. Using the charts and notes from each session, re-visit your goals and create a comprehensive action plan to help achieve collective agreement on how to move forward. Include individual/household actions as well as community actions you may want to act on. Keep in mind that scientific information cannot substitute for value choices, nor can science identify the most appropriate set of values.
